

D.J.N AUTOMOTIVE

FROM a very young age David Nicholas has had a passion for mechanics and cars, helping out and fixing lorries and fabricating items for his dad's business.

It was his drive and determination that led Dai, as he is more locally known, to start a Saturday mechanics course at the age of 13 to develop his skills.

After leaving school,

Dai trained with BMW / MINI UK in Reading and passed the course with high grades, which lead him to six successful years at Green Bower. By this time, Dai had his sights set on building his own business, so after a couple of months travelling around Australia Dai came back to the county in March 2010 and set up DJN Automotive which is located on the outskirts of Dinas Cross around three miles from Fishguard.

Since then, despite very difficult economic times, the business has grown well with a second bay added to the workshop and the latest state of the art scissor lift. This now means the workshop benefits from a four ton post lift and a three ton scissor lift, allowing for most types of vehicles. Dai is confident that with continued growth he will in the future be looking to create local jobs as well as offering an apprentice the chance to gain experience and skills.

DJN Automotive offers full diagnostic and programming facilities for BMW and MINI and a general insight into diagnostics for the rest of the automotive market, which means all makes and models are welcome. As well as these services, DJN also offers MOT preparation and repair, all servicing and repairs at very competitive prices. Dai is also ATA accredited and has BMW technician status.

All in all, DJN Automotive is a well respected local business that has a very simple business ethos. Owner Dai explains: "The reason I set up business was to provide a good honest service to people for a very fair

price and give them a chance to get work done quickly and to the highest standard."

It's very much a one to one professional service when you deal with DJN Automotive. The person, who books you in also works on your car, orders the parts and closes the job.

You really can't ask for more in a business, so to book your appointment telephone 01348 839001 or 07967 805464. Email dainicholas@hotmail.co.uk
